

Why use a solar pool cover?

An uncovered pool can lose thousands of litres of water to evaporation. When water evaporates, so do the chemicals - and any heat which may have been gained. A pool cover will not only save you on the water bill, however on your electricity bill also.

550 Micron Premium Pool Cover

- 550 micron - thicker, stronger, better!
- 10 year pro-rata warranty
- Can stop up to 99.84% of evaporation
- UV stabilised for the Australian climate
- Lets the sun through for a warmer pool
- Helps keep a pool up to 8OC warmer than an uncovered pool
- Cuts chemical consumption in half
- Our covers contain extra UV inhibitors, specially formulated to resist sun, salt and chemicals
- Made in Australia, using Australian materials
- Durable, low profile bubble shape with no weak spots
- Smart Approved WaterMark, WaterWise and climate care certified

Cut evaporation by up to 99%	✓
Cut chemical use by approx 50%	✓
More translucent for faster solar gain	
Long term solar gain & retention	✓
Best for heated pools	
Non heating - blocks sunlight	
Best for major leaf or duck problems	
Deters ducks & birds	✓
Can be used with a reel	✓
Can be used all year round	✓
Reduce carbon footprint	✓
Climate Care Certified	✓
100% Australian Made	✓
Warranty Period (years, pro-rata)	10
