

Product Description

In-Ground Downunder

If you are after a premium roller with a discrete architectural finish, all while maximising your pool area, look no further than our award-winning Downunder Roller series.

Our Downunder Rollers hide out of sight, leaving your pool area's aesthetics uninterrupted by bulky poolside rollers. A precision-finished aluminium lid hides the Downunder's robust stainless-steel roller underneath your deck, concrete or paved area.

To deploy your cover from our Downunder Roller series, the aluminium lid is flipped open, and your cover is easily pulled out into position. To roll up the pool cover, take advantage of our easy to use 2:1 ratio, waist-height handle. Simply wind it up and close the lid.

So maximise your entertainment area with a prestige quality hidden roller from an Australian made brand that you can and trust.

Low friction gears

- The most robust gears on the market
- Easy to use 2:1 Ratio
- Unique low friction design

Stainless Steel Frame

- State-of-the-art single piece design
- Constructed with high quality stainless steel with no weak points
- No onsite assembly required

Aluminium Tube

- Single piece tube for superior strength
- 114mm diameter gives greater rigidity

In-Ground -PVC Plastic Case

- Thick PVC plastic will last in the ground and not deteriorate or corrode
- Designed in a single oval shaped piece for easy installation
- Secured with metal ties (to REO) front and rear

Aluminium Lid

- Lite and easy to use (safe for fingers)
- Durable for foot traffic
- Aesthetically superior
- Aluminium silver lid

Product Description

Pool Covers

Why cover your pool?

A pool cover is an essential accessory for swimming pools, offering both functional and environmental advantages. It significantly reduces evaporation, which also means a decreased need to replenish the pool with fresh water and chemicals, saving resources and reducing chemical use.

For heated pools, a cover retains warmth, therefore reducing energy consumption and the associated greenhouse gas emissions from fossil fuel heaters.

By incorporating a pool cover, pool owners are making an environmentally responsible choice, contributing to water and energy conservation while also enjoying the practical benefits of cleaner and safer pool water.

Thermal Pool Covers - *Ideal for heated pools*

Discover unparalleled excellence with our Thermal Pool Covers, providing superior heat retention, durability, aesthetic, and cost-savings.

Did you know an uncovered heated swimming pool can lose double its water volume over a year? Our Thermal Pool Covers are here to counter this issue—saving up to 99% of water loss and retaining twice the amount of heat compared to alternative covers.

Designed specifically for heated pools, our thermal covers offer efficient temperature regulation without generating excess heat on hot days. Furthermore, they protect your pool from debris and sunlight that can cause algae growth. This means you'll need fewer chemicals to keep your pool clean, leading to further savings.

Renowned for their robust durability, our Thermal Pool Covers are crafted to withstand the test of time, outlasting many other options on the market.
