THE CLEANEST, SAFEST WATER
FOR NEW AND EXISTING POOLS

EXPERT LINE™

ONLY FROM POOL PROS

3+ YEAR PARTS & LABOR WARRANTIES*

*When sold by a Totally Hayward® partner. Exclusions, other terms and conditions may apply — visit hayward.com/expert for details.

SUPERIOR ALL-IN-ONE SANITIZATION WITH UV, OZONE AND HYDROXL RADICALS.

Improve any new or existing pool's sanitization capabilities with the 3-in-1 power of HydraPure™. By combining the germicidal properties of UV with the oxidative power of ozone to form hydroxyl radicals—one of the most potent oxidizers known to man—HydraPure effectively destroys 99.9%* of chlorine-resistant microorganisms in pool water. And with an intelligent, all-in-one design that operates efficiently at 10-120 gpm, pool owners get the cleanest water at any flow rate.

Rotatable lid makes

control-panel access easy from any angle

Ozone inactivates organic compounds and stops chlorine byproducts from forming

UV inactivates

microorganisms with germicidal properties and combines with ozone to create a third sanitizing oxidant, **hydroxyl radicals**

Advanced performance capability operates at both very low and very high flow rates, offering lower head loss at all flow rates without requiring a bypass

INCOMPARABLE WATER QUALITY

HydraPure not only provides an added layer of sanitization—it reduces irritating chloramines for softer, gentler water.

LESS CHLORINE MAINTENANCE

UV, ozone and hydroxyl radicals reduce the amount of chlorine required for effective sanitization.

FITS IN EASILY—ANYWHERE

All-in-one design makes HydraPure simple to install, and a rotatable control panel with notification lights makes maintenance easy, too.
